Real-world evidence shows improved asthma outcomes with **AeroChamber Plus® Flow-Vu® Chamber**.

### Landmark asthma study demonstrates device choice determines asthma control

- **10-12%** less likely to experience an exacerbation
- **13%** less likely to visit an emergency room
- **19%** less likely to be hospitalized

### Evaluation of **Flow-Vu® Inhalation Indicator**

- **4x** QoL
- Approximately 4x increase in caregiver Quality of Life

### Did You Know?

- **9 out of 10** Canadians with asthma don’t have their symptoms under control.

Asthma is the **most common chronic disease among children** and a leading cause of hospitalization.

- Last year there were more than **70,000 emergency room visits** due to asthma attacks in Canada.

People who use a valved holding chamber with their metered dose inhaler versus metered dose inhaler alone **have better control**.

Patients do not use their inhalers well enough to benefit from the prescribed medication.

Guidelines recommend chambers for **both children and adults**.
